Who We Are

NISTA Technologies (NISTA LLC) is an engineering-led technology company focused on mission-critical platforms, cloud modernization, AI automation, cybersecurity, and data engineering. We help organizations modernize enterprise architecture, automate complex workflows, and deliver secure, scalable technology solutions.

MISSION

Engineering intelligent technology that empowers organizations to solve complex operational challenges through artificial intelligence, secure cloud architecture, and modern software engineering.

VISION

To become a trusted technology partner for government and enterprise organizations by delivering innovative software platforms, AI-driven solutions, and mission-critical engineering that improve operational resilience and efficiency.

WHY GOVERNMENT

Engineering-led delivery, secure-by-design architecture, and founder-level technical oversight on every engagement — built for organizations that cannot afford downtime.

PLATFORM ENGINEERING

Enterprise Platform Modernization

CLIENT ENVIRONMENT

Multi-department enterprise organization supporting 500+ users.

SCOPE

- Platform engineering
- Systems integration
- Workflow automation
- Security architecture & CI/CD

BUSINESS OUTCOMES

- **70% reduction in manual workflows**
- **Enterprise integrations delivered**
- **Improved operational visibility**
- **Increased platform reliability**

CLOUD ENGINEERING

Cloud Integration Architecture

CLIENT ENVIRONMENT

Organization operating disconnected cloud systems and data silos.

SCOPE

- Cloud architecture
- Microsoft Azure integration
- Data pipeline automation
- Systems integration

BUSINESS OUTCOMES

- **Thousands of records processed daily**
- **Reduced manual reconciliation**
- **Unified data pipeline**
- **Improved data accuracy**

AI PRODUCT ENGINEERING

AI Product Engineering

CLIENT ENVIRONMENT

Organization requiring AI-driven automation for live production environments.

SCOPE

- AI product engineering
- Cloud-native architecture
- Real-time operational systems
- DevOps & deployment automation

BUSINESS OUTCOMES

- **Production SaaS platform delivered**
- **AI-powered automation**
- **Cloud-native architecture**
- **Real-time operational reliability**

● GitHub

● CI / CD

Why NISTA is Different

Engineering Without Layers

Unlike many consulting firms, NISTA delivers direct access to senior engineering leadership throughout every engagement. Our founder remains actively involved in architecture, delivery, and technical decision-making, ensuring quality, speed, and accountability from discovery through operations.

Direct Access to Leadership

No account managers standing between you and the engineers building your system.

Speed Without Sacrificing Quality

Fewer layers mean faster decisions — without cutting corners on engineering discipline.

Founder-Level Accountability

The person accountable for the engagement is the person doing the engineering.

Customer Outcomes

500+
